Weekly Coal Production

Production for Week Ended:
November 7, 1992

Summary

U.S. coal production in the week ended November 7, 1992, as estimated by the Energy Information Administration from railroad car loadings, totaled 19 million short tons. This was about the same as in the previous week but slightly lower than in the comparable week in 1991.

Production east of the Mississippi River totaled 12 million short tons, and production west of the Mississippi River totaled 7 million short tons.
